GENERAL

Please check in 30 minutes prior for MRI and 15 minutes for all other appointments unless stated otherwise. You will need to bring a picture ID, a copy of your insurance card and any completed, related studies such as X-rays or CT scans. Tell your doctor and the technologist if you are pregnant or think you may be pregnant. We require 24-hour notice for changes to any appointment or for cancellations.

Diabetic patients and patients age 60 or older will require a creatinine test prior to the administration of IV contrast. Test results need to be within 30 days of exam date. If needed, a test can be performed onsite free of charge the day of the exam. Please call the center for more information.

MRI

Patients cannot be examined if they have any of the following: a pacemaker, aneurysm clips in the brain, ear implants, implanted spinal cord stimulation or metallic fragments in one or both eyes.

Patients will be asked to remove all metal from their person (i.e., earrings, watches, hairpins, barrettes) and credit cards. Lockers are provided. It is helpful if patient's clothing is comfortable and doesn't include metal buttons, snaps or zippers.

For MRCPs, MRAs of abdomen and renals, or MRIs of the liver, pelvis and abdomen: The patient should not have anything to eat or drink (including water) 4 hours prior to exam.

CT

Please notify the center of any history of allergies prior to taking prep.

CT of Abdomen & Pelvis

Plan on arriving 1 hour before exam for the administration of oral contrast. Do not eat or drink anything 6 hours prior to exam.

CT Colonography

Patients MUST pick up Tagitol V from our Anchorage office at least 2 days prior to scheduled CT appointment.

CT of Multi-Phase Liver/Renal

Do not eat or drink anything 6 hours prior to exam.

Abdomen: Pancreatic or Gastric Tumor/Renal

No oral contrast.

Do not eat or drink anything 6 hours prior to exam.

ULTRASOUND

For abdomen, aorta, liver transplant, mesenteric duplex, portal-hepatic duplex or renal arterial duplex: Do not eat or drink (including water) after midnight the evening before the exam.

For pelvis, renal and OB ultrasounds, you will need a full bladder. Drink 32 ounces of water 1 hour before the exam and do not urinate until after test.

NO PATIENT PREP is necessary for the following ultrasound procedures: thyroid, breast, carotid duplex, testicular, venous duplex, ABI and arterial lower extremity.

BREAST IMAGING

Do not wear deodorant, powder or lotion.

NUCLEAR MEDICINE

Special prep may be required before the scan is performed. Please call our center 24 hours prior to exam for exam instructions.

DIAGNOSTIC RADIOLOGY

Barium Swallow UGI & SBFT

Nothing to eat or drink after midnight the night before the exam.
